Water Well Consulting Services

Before your water well can be drilled or brought online, there are a few things you need to do:

- Meet all permit requirements
- Test Newly drilled wells for all Primary Drinking Water Standards and submit to DHH for approval
- Test repaired or newly drilled wells for Bacteriological Clearance
- Develop updated and revised DHH sampling plan for the distribution system

In order for your system to remain in compliance, Booth Environmental can sample for the required contaminants for all water systems on a regular basis:

- Bacteriological contaminants
- Lead and copper
- Disinfection By-Products such as TTHMs and HAA5

Booth Environmental can also provide daily Chlorine monitoring of water systems, as required by Title 51 Part XII Chapter 3 §355 of the Sanitary Code.

Call (337) 474-7325 today to schedule your clearance testing!

Other Services We provide:

- Inspect and report for health code compliance
- Assess current systems for new sanitary survey compliance
- Total Coliform Sampling
- Fecal Coliform Sampling
- Water Well Sanitization
- Lead and Copper Sampling from indoor taps
- Nitrates Sampling
- VOCs (Volatile Organic Carbons)

We have the most competitive consulting prices in the state! Guaranteed!
